Subject: FYI: Call from John Mays, COO for Powertech

John Mays called today. He notified me about the ASLB's decision. He offered his interpretation of the Board's ruling including 106 NHPA compliance. His interpretation seemed to generally comport with our thinking (which I did not disclose). I did let him know that we continue to brief our management on our draft permitting efforts and related actions including this ASLB ruling. I told him that Shaun would be fully informed on the status of our actions prior to his meeting Powertech on Thursday afternoon on June 11th for a field tour of the DB site.

He reminded me that today was the deadline for requesting a stay of NRC's license. He also hinted that Powertech is considering an appeal of the Board's "NEPA hard look" finding by the May 26th deadline.
